AES' approach from the fundamentals, upon clearly understanding the customers' requirements, would enable the right choice of power plant with the right technology so that customers will not lose out on the **A**vailability, **R**eliability and **E**fficiency.

AES develops a sufficiently comprehensive analysis of the technical and commercial feasibility of the proposals, including detailed engineering and its costing, to conclude the correct investment decision by participating businesses.

Our support can vary from feasibility study to turnkey retrofit projects, including engineering, procurement, supervisory on-site construction and commissioning services.
